

# Bio Tab WT

Solid blocks  
self-dosing  
for the treatment  
biological effluent

*Treat the environment, naturally!*

Bio Tabs have a high concentration of microorganisms natural what they are freed in constant form It is gradual, through of contact from the water, for the digestion of organic waste that causes bad odors It is clogs undesirable It is problematic.

Bio Tab is applied directly to gutters, drains and manholes that have bad odors or that precede problematic pipes.

O product he has one great performance at the combating and preventing blockages, maintaining pipes and eliminating odors.

Each Bio Tab has an duration average o f 30 days, consonant to the many different conditions.

## Indications:

- Shopping Centers, Canteens, Cafeterias
- Hotels and Restaurants
- Schools, Condominiums, Bathrooms and Gyms
- Industrial kitchens and Industry in general

## Our Biotechnology products in effluent treatment

Caustic liquid products, solvents and acids only unclog small channels that easily clog again.

Mechanical processes cause small perforations that are susceptible to new clogging.

Our solutions digest organic matter, leaving a biofilm in the pipes that maintains biological activity, preventing new clogging.

### Advantages of Bio Tab WT

- ✓ It is not necessary to invest in expensive equipment, such as dosing pumps and electromechanical devices, normally used with liquid products;
- ✓ It is a biodegradable, safe and non-aggressive product for users and the environment;
- ✓ Allows continuous treatment 24 hours a day;
- ✓ Reduces the working time required to maintain systems;
- ✓ Dramatically reduces water consumption when washing;
- ✓ Automates the treatment of drains and pipes;
- ✓ Each Bio Tab treats 10,000 liters of water.
